BlinderMOB
Illuminating FACTS

The Mob is coming to take the streets.

With different technologies for different urban riders, these five dark characters come in front, rear and vertical lights*. They have a range of weapons to beat the competition. Like 2 (front) or 3 (rear) interchangeable straps – with one to fit aero posts. And their beams, which range from ultra-focused to ultra-wide so they never get caught out. Take a look here at more of the Mob's unique characteristics.

FRONT LIGHT	Eyeballer	Four Eyes	The Face	Kid Grid	Mr. Chips
No. of LEDs	1	4	4	16	36
Type of LED	LUMILEDs	Surface mount (SMT)	Surface mount (SMT)	Surface mount (SMT)	Chips on board (COB)
