

**KNOG  
RUNNING  
2021**

**Obsession:** an idea or thought that continually preoccupies or intrudes on a person's mind.

At Knog we are **obsessed** with products.

We **obsess** about their design and we **obsess** about their functionality.

We **obsess** about the materials we make them from, then we **obsess** about testing them and continually improving them.

This **obsession** enables our customers to confidently use Knog products to discover their own version of **freedom**, whatever that may be.

**OUR OBSESSION IS YOUR FREEDOM**

**Knog makes innovative products that inspire people to explore the great outdoors on foot or two wheels.**

**Knog knows that active means different things to different people. For some, cycling means riding to the pub with their mates, to others, it's cycling across a country or a continent, barely stopping to recharge for weeks on end.**

**Likewise, for some the "great outdoors" is a weekend living in a tent at a music festival.**

**To others it's nothing less than a two-week solo trek through the Amazon.**

**Whatever active in the outdoors looks like to you, Knog wants to help you to have the best experience.**

**Knog has been designing innovative products in Melbourne since 2002. And you can thank us for sending you out to play. In all that time, we've never made a product that encourages you to stay indoors.**

**We want you to go out. We want to be with you in the rain, in the sun, lighting up dark lane ways, helping you see, and helping you be heard.**

**We design products so we're with you on the town, on the road, and in the wilderness.**

# THE NUMBERS DON'T LIE

Knog's obsessional approach to making products, has produced some of the best selling, most beloved and most copied cycling products ever.

# **KNOG'S RUNNING PRODUCTS**

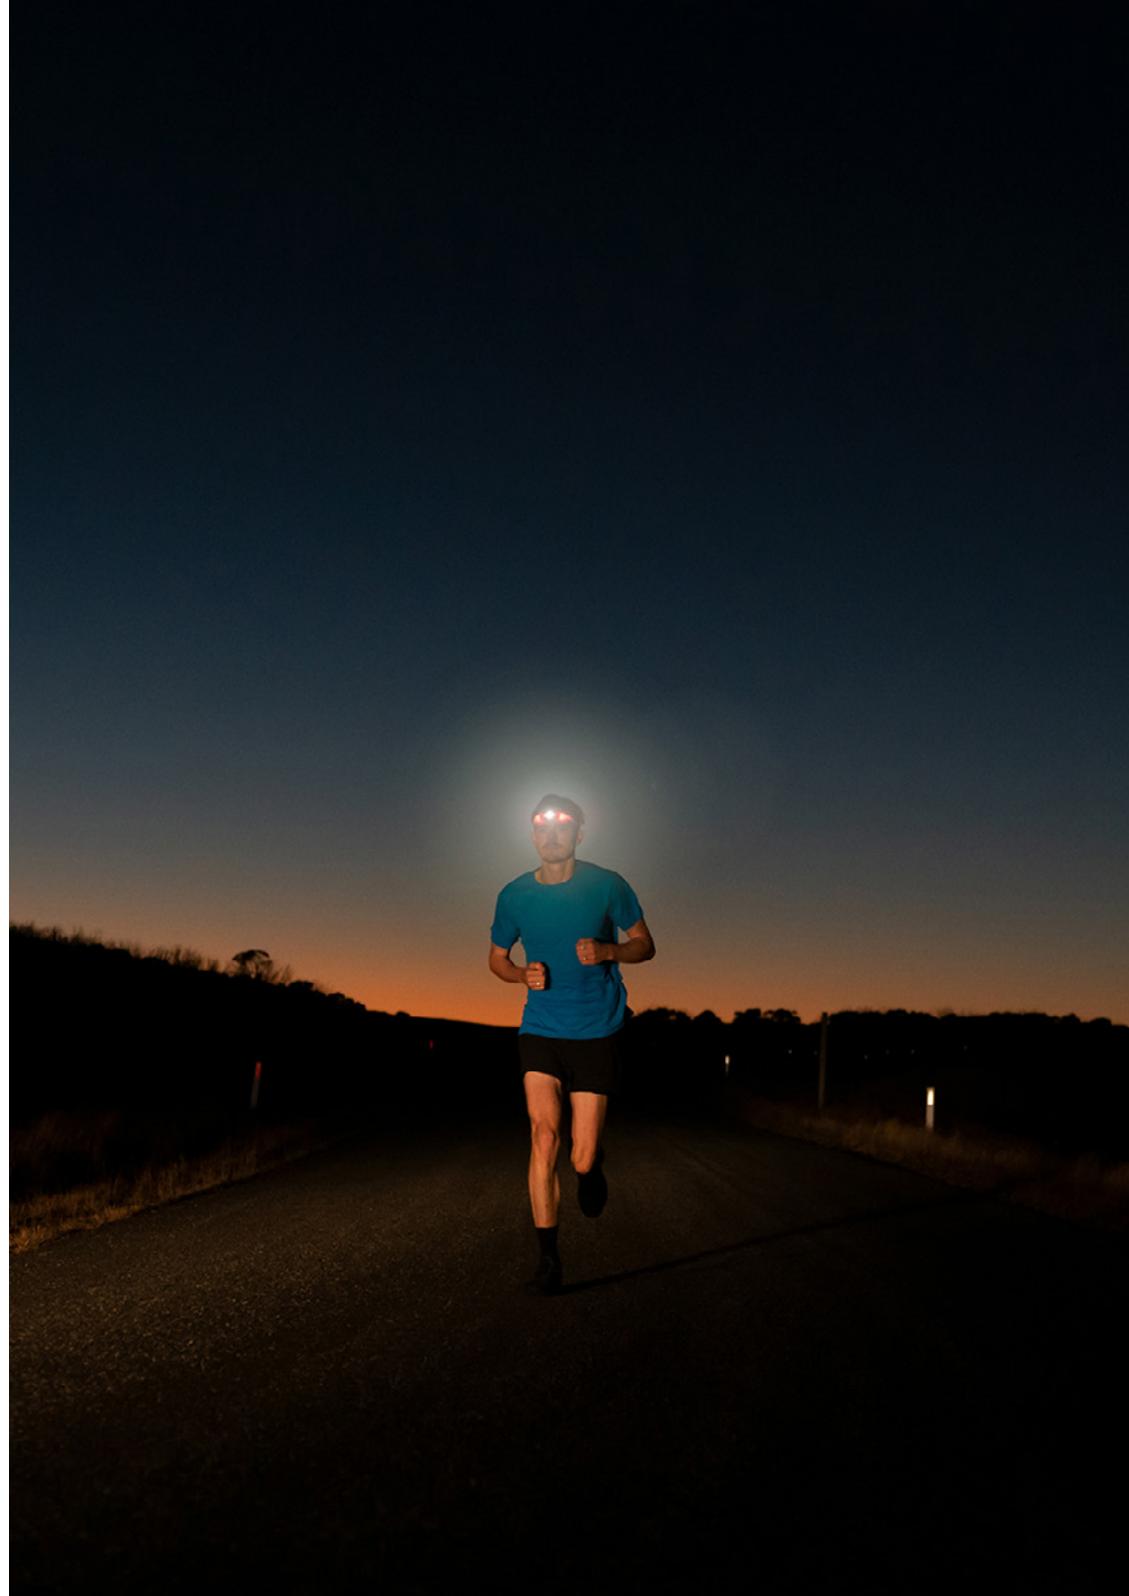

## **BILBY RUN 400**

---

Simply put, Bilby is the world's most powerful silicone running specific headlamp. Bilby is an extremely powerful, comfortable, silicone headlamp that is suitable for running in the most extreme conditions.

As a result of its construction from transparent silicone, when the headlamp is in operation a red halo light effect is created which helps increase your visibility to other road users, making the Bilby Run 400 the perfect high-powered running headlamp.

### MULTIPLE LIGHT OPTIONS

The 5 LEDs on the Bilby Run are optimally placed for their individual purposes – a high beam to see by, 2 elliptical beams for mid and wide beam angles, a red light for night light purposes and downlights for reading. Within each mode there are four brightness settings. On the brightest setting, the Bilby Run has a range of up to 150m. Another unique feature of the Bilby Run is that the beam angle can be manually adjusted via an electronic tilt function, allowing the user to set to the perfect beam function for their use.

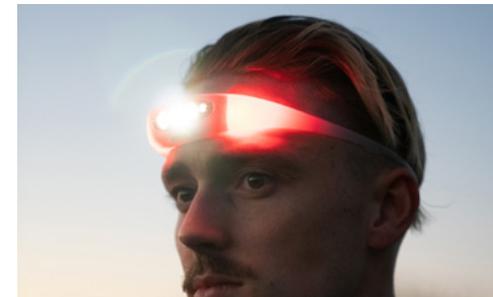

### INTEGRATED USB RECHARGEABLE

Another outstanding feature of the Bilby Run's design is the fact that the USB is integrated into the lighting pod – which means no cables to lose or break. To recharge the headlamp, simply plug the pod into a USB-A port, and you'll have a full charge in just 4 hours from flat.

### MATTE SILICONE FINISH

The Bilby Run's body and strap are moulded in matte finish medical grade silicone that won't tangle your hair. It's easy to clean and is adjustable to fit head circumferences from 300- 660mm. The extremely comfortable silicone strap adjusts with a toggle. Once you've found your size you can set and forget or adjust on the fly.

### RED LIGHT HALO EFFECT

A unique feature of Knog's running headlamps is the Red-Light-Halo-Effect. As a result of its construction from transparent silicone, when the headlamp is in operation a red halo light effect can be selected which helps increase the user's visibility to other road users. This feature has been specifically designed to keep runner's highly visible to other road users and works independently of the main headlamp beam.

## WEARABLE OUTDOOR LIGHTS

12g  
WEIGHT

**WEARABLE CLIP**

Plus Free's simple clip design means the options of where and how to attach your light are almost endless. Use the clip to attach the light to your t-shirt, shorts, socks, cap, headband, backpack, dog collar, basically anywhere you need extra visibility. Extremely lightweight at just 12 grams once attached Plus Free's rubber o-ring feature then secures the light securely in place keeping your light secure and the user highly visible.

**UNRIVALLED LED TECHNOLOGY**

Plus Free produces an impressive 40 lumens of light from the front and 20 lumens from the rear and features 5 different light modes. Enjoying run times of up to 40 hours on eco flash. The Plus Free's efficient Chip on Board LEDs are designed to provide maximum brightness level for up to 90% of the battery burn time for each mode.

**NO CHARGING CABLE REQUIRED**

No charging cable is required for your Plus, its integrated USB plugs directly into USB ports. A full charge is achieved in 4 hours. When your Plus Free is running low on battery, a red light will light up around the button. This light will turn off once the light is fully charged and ready to go.
